

Acting as an investor and owner of the project for construction and operation of Amur Gas Processing Plant, one of the world's largest natural gas processing sites, Gazprom Pererabotka Blagoveshchensk LLC is fully aware of its responsibility towards the society for ensuring safe working conditions and occupational safety, preserving the life and health of its employees, ensuring industrial, and fire and road safety when processing multicomponent gas supplied via Power of Siberia main gas pipeline from the Yakutsk and Irkutsk gas production centers.

Construction and operation of Amur Gas Processing Plant is carried out within the framework of the Eastern Gas Program of PJSC Gazprom and is an important link in the process chain of natural gas supplies to China via Power of Siberia main gas pipeline.

Amur Gas Processing Plant produces helium, ethane, propane, butane, pentane and hexane fraction – valuable components for the gas chemical and other industries.

Gazprom Pererabotka Blagoveshchensk management recognizes the priority of ensuring the life and health of its employees in relation to the results of its production activities, considers occupational, industrial, fire and road safety as the necessary elements of an efficient industrial safety management.

GOALS IN THE FIELD OF OCCUPATIONAL, INDUSTRIAL, FIRE AND ROAD SAFETY

Main goals of Gazprom Pererabotka Blagoveshchensk LLC in the field of occupational, industrial, fire and road safety include:

- ▶ creating safe working conditions, protection of life and health of the employees;
